

Edition 2

Viper in Cyprus Rock On

Thanks to Team Hybrid and their fantastic Viper, bike riding everywhere is now possible and with great results. The past two weeks that I have had my viper have been incredible. I feel as if I am 12 years old and just gotten my first bike... I want to ride it all the time everywhere even in the house! Riding after 18 years with my family is ... PRICELESS !

Supporting Help for Heroes - A Bridge Too Far Bike Ride

Team Hybrid were proud to assist Help for Heroes Team Battle Back by providing a hand cycle for one of their injured service personnel team to participate in a 7 day cycle ride adventure challenge from London, Brussels, Antwerp and finishing Arnhem from 13th to 19th September 2010. In recognition of our support, we are pleased to be recognised as one of the official corporate sponsors of this event. For more information please visit their website page:

Mobility Roadshow

This year's Mobility Roadshow held in Peterborough on 1st, 2nd and 3rd July 2010 was a great day out for all the family and Team Hybrid's most successful show to date. We had more orders than any show so far and the interest in our hand cycles was outstanding.

Now in our 8th year we are firmly established as the UK's leading manufacturer of manual and powered hand cycles and we believe that our customers use the Roadshow to take the opportunity to try out our attachments at their leisure and purchase our cycles at the special show prices.

Did you attend the Peterborough event? What did you think of this year's event? What did you think of our stand? Please let us know.

Competition Winner

Congratulations to Dan Bussey on winning the Young & Able Magazine Competition.

As Dan is only 5 years old, we will be designing a custom made adaptation to fit his new wheelchair just for him!

Visit our web site frequently to see the work in progress - www.teamhybrid.co.uk

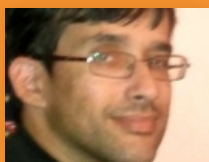

Team Hybrid now stocks Top End Force recumbent hand cycles with centre frame for easy transfers, aerodynamic design offers adjustable, lay-down - reclining position ensuring optimum comfort for competition, training or leisure. For more info see our website.

International Disability News

California's Berkeley Bionics have designed eLEGS exoskeleton, a computer controlled device to enable wheelchair users to walk - albeit with the aid of crutches. For more info and photos please [click](#).

Testimonial - Adem Abdullah

"Just want to say that my Viper is my life...I have among my friends got the nickname Chopper. My left upper body is restricted, so using the bike is great...simply the best £2,000 I have ever spent."
